

MRF-X[®]

MRF-X is an advanced workstation

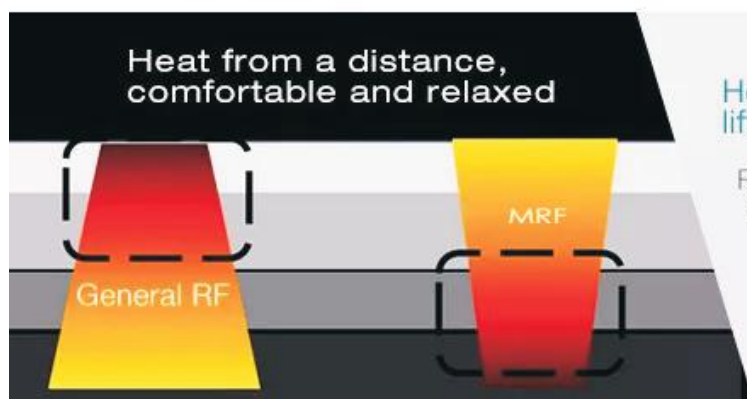

Theory

MRF-X is a new generation of non-invasive anti-wrinkle technology, which applies advanced navigation and positioning the patent technology to make advanced 250W focused RF energy penetrated to the dermis and SMAS layer that traditional surgical lifting reach.

It makes collagen protein immediately shrink and stimulates regeneration and reorganization, then constructs a new collagen fiber network. Three-dimensional improving skin-supporting structure from deep to shallow.

A single operation can get firming skin, lifting face and removal wrinkle, immediate effect, which beyond the majority of the non-invasive firming projects.

To achieve face lifting and firming by non-surgical, no hurt no pain

The diagram shows two energy penetration profiles into skin layers. On the left, 'General RF' is represented by a wide, shallow cone of heat that reaches the dermis but does not penetrate deeply. On the right, 'MRF' is represented by a narrow, deep cone of heat that reaches the SMAS layer. The text above the diagram states 'Heat from a distance, comfortable and relaxed'.

Heat from a distance, comfortable and relaxed

Heat from a distance, focused depth, lifting SMAS

General RF

MRF

Focused radio frequency, broken innovation successfully, accurate stratification, which makes it possible that non invasive deep lifting. The traditional anti-aging heating is too shallow or only a single point of heating.

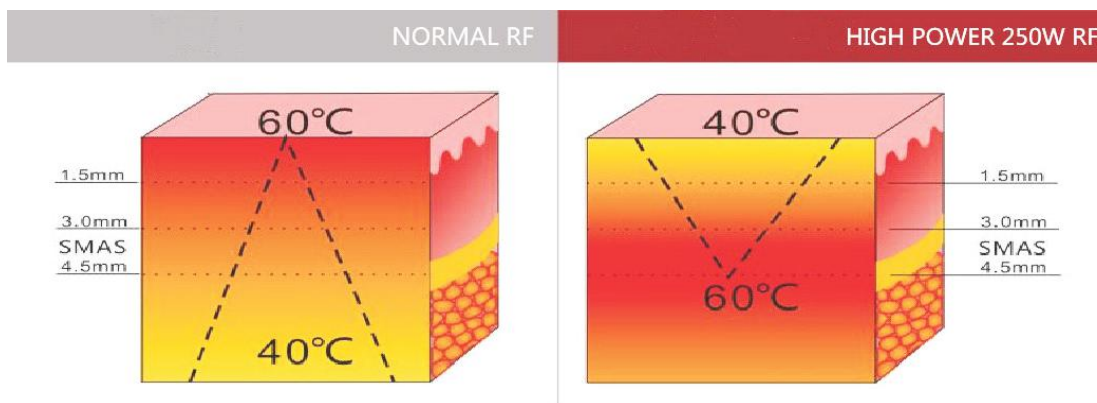

Lifting in three layers, effect is lasting.

Three layers targeted heating, the effect is much better than the market on the same kind of non invasive skin pulling equipment! The overall effect is longer.

New Technology, rejuvenate skin layer by layer

MRF can accurately make the radiofrequency energy act on the dermis shallow layer (superficial layer, middle layer, and deep layer). Precise temperature control keeps the SMAS layer heat at 60 degrees Celsius and the skin temperature at 40 degrees Celsius. The role of heat is to promote the collagen immediate shrinking and promote the skin structure immediately tautly, to achieve the young effect of skin firming and lifting.

MRF-X[®]

Positioning and Navigation Tech

Positioning and navigation technology, three-dimensional reconstruction of the skin support structure from deep to shallow, significant result after only one treatment, 3 - 5 years long-lasting treatment effect.

No consumables, cost-effective

There is no need to change the treatment tips regularly. Not like the HIFU machine, MRF handpiece does not have limited using shots, you can increase the operating times freely.

MRF-X is an advanced workstation

1. High Tech Full Screen : it adopts newest generation Iphone screen, very Eye-catching
 2. Advanced Real-time Temperature Sensing : with different color to show temp, from blue to red, very easy for operator
 3. Super Strongest RF until 250W,available for full body treatment, such as face, abdomen, upper Arm, buttocks, thigh,calf
-

1
Wrinkles Removal

2
Skin Tightening

3
Visceral Fat Removing

4
Beautify the Skin

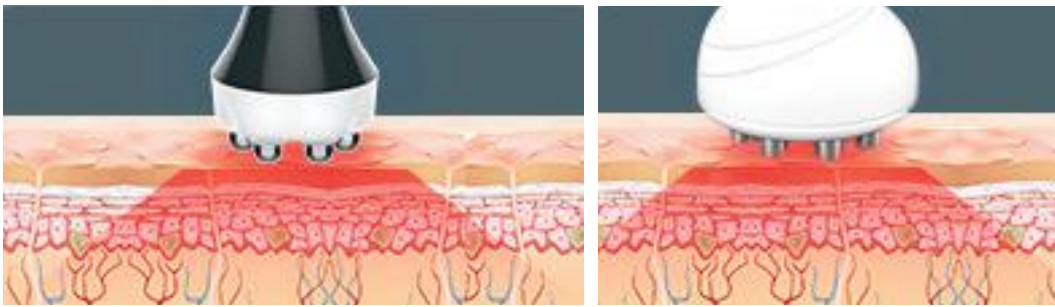

5
Body Shaping

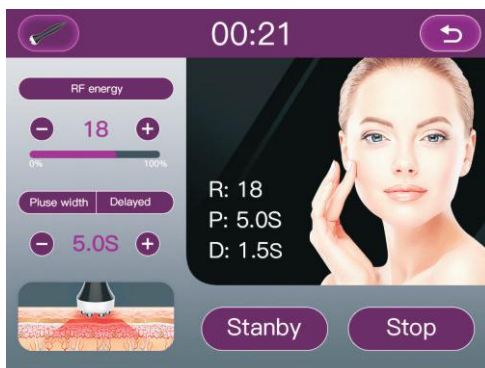

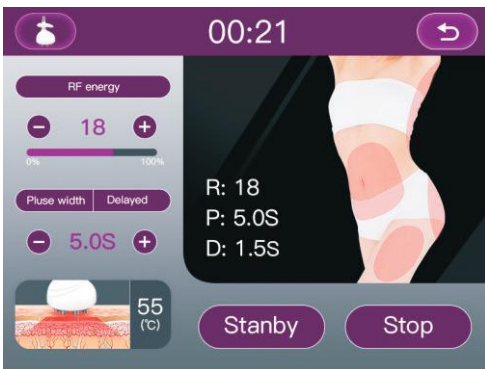

MRF-X[®]

Application

MRF-X adopting the newest generation of RF firming technology, and the accurate action on superficial layer, middle layer and deep layer to achieve the purpose of wrinkles removal, skin tightening, visceral fat removing, skin beautifying and body shaping.
